

LuneOS - Bug # 1199: messaging threads always open to first message

Status:	New	Priority:	Normal
Author:	Matt Williams	Category:	Applications
Created:	01/16/2017	Assignee:	
Updated:	03/02/2017	Due date:	
Description:	When opening a thread in the messaging app, scroll position is not being initialized correctly. It always opens showing the top of the conversation, i.e. the oldest message at the top of the screen. Should initialize to show the newest message or at least newest unread message if that is possible.

I realize this may already be known and on the radar to implement, but wanted to make sure.

I recently noticed that it also jumps to the top of the conversation every time a new message is sent or received. Makes it very difficult to have a conversation. :)
